PCT/JP2005/001967

Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;  
citations and explanations supporting such statement

search report sets forth a feature wherein an application program for superimposing graphics, text, drawings, images and the like is downloaded, and it would be easy for a person skilled in the art to conceive of obtaining the program set forth in document 1 by downloading as set forth in document 2.

In addition, document 3 cited in the international search report sets forth a feature wherein in order to superimpose images stored in separately provided storing means, the sequence of superimposition is stored, and images are superimposed based on said sequence. It would be easy for a person skilled in the art to employ the feature set forth in document 3, wherein synthesis display is carried out based on a sequence of superimposition, when synthesizing and displaying graphic images, video images and still images as set forth in document 1.

Therefore the invention set forth in claims 1, 12 and 13 does not involve an inventive step in the light of documents 1 to 3. Similarly, the invention set forth in claims 2 to 11 does not involve an inventive step in the light of documents 1 to 3.

**Supplemental Box**

In case the space in any of the preceding boxes is not sufficient.

Continuation of:

(Continuation of Box I.4)

As set forth in claim 14, "at least one of a plurality of graphic images stored in different graphic image storing means" is made to serve as a "graphic image whose position of depiction changes over time", and the feature of superimposing "different graphic images" containing "graphic images whose position of depiction changes over time" is not specifically disclosed as an embodiment in the description at the time of filing.

As a consequence, the amendment which adds claim 14 causes the subject matter of the application to be extended beyond the content of the application as filed.

Similarly, the amendment which add claims 15 to 19 contains the invention set forth in claim 14, and causes the subject matter of the application to be extended beyond the content of the application as filed.
